VOLTAGE PROTECTOR

**Compact size and easy installation
Includes LED indicators that show the voltage level**

SE - VP - B / SE - VP - W

The voltage protector *SE - VP - B/W* has a unique design, safe and compact, ideal to automatically protect your equipment against transient overloads and voltage drops: suitable for use in high consumption electronic equipment, has a protection against electric shock up to 1800W and an exclusive 350° rotation design that allows you to accommodate all your devices at the most suitable angle so as not to obstruct the rest of the current sockets.

It includes protection indicators, low and high voltage, as well as a practical on / off switch with the function of decreasing the unnecessary consumption of electricity.

MODEL	FEATURES	SE-VP-B / W
INPUT	Voltage range	90/140VAC
	Joules	900J
	Max. spike current	1800W
	AC plug style	NEMA 5-15P
OUTPUT	Outlet type	1 NEMA 5-15R
	Delay timer	15/30/180 seg
	Switch	On/Off
	Network/Phone	RJ-45/RJ-11
GENERAL	Visual indicators	3 LEDs
	Color	Black / White

- 3-in-1 voltage protector that protects your equipment automatically against potentially harmful fluctuations and other irregularities in the supply line.
